ID&R Best Practices/Strategies

Which best describes
your current ID&R
practices during the
pandemic?

Best Practices/Strategies

The MEP can only be in so many places at one time.

An effective school and community connection expands the MEP's ID&R network and can lead to more migratory children being recruited.

The screenshot displays the USDA Food Safety and Inspection Service (FSIS) website. The header includes the USDA logo, the text "Food Safety and Inspection Service U.S. DEPARTMENT OF AGRICULTURE", and navigation links for "ABOUT FSIS", "CONTACT US", "CAREERS", "NEWS & EVENTS", and "EMPLOYEES". A secondary navigation bar contains "FOOD SAFETY", "SCIENCE & DATA", "POLICY", "INSPECTION", "RECALLS", "SEARCH", and "FULL MENU".

The main content area is titled "Meat, Poultry and Egg Product Inspection Directory". It includes a left-hand navigation menu with categories like "Inspection", "Establishments", and "FSIS Inspected Establishments". The main text describes the MPI Directory as a listing of establishments that produce meat, poultry, and/or egg products regulated by FSIS. It notes that the data is updated monthly and provides a "NOTE" regarding the accuracy of the data. A bullet point suggests contacting the FSIS Inspector-in-Charge if an error is found.

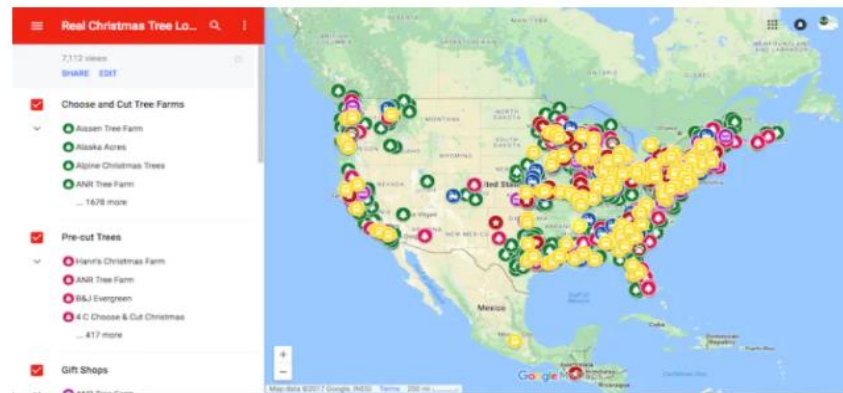

Below the text is a search interface titled "Search by Location or Establishment Number". It features three search boxes: "Search by Region", "Search by State", and "Search by Est. Number". A "User Guide" link is also present. Below the search boxes are links for "Data Dictionary" and "Search by Activity", with sub-links for "Livestock Slaughter", "Poultry Slaughter", and "Processed Products". A map of the United States is shown at the bottom, with blue dots representing the locations of inspected establishments. The map is updated monthly.
